What Is Photoshop? It's a graphics application that enables users to do digital photo retouching. The name Photoshop is attributed to John Chambers, the founder of Adobe Systems, who made up a slogan for the company to grow: "Accelerating the imagination of a worldwide community of creative professionals." The program was first introduced in 1989 and has gone through a number of upgrades since then. It provides a powerful toolbox of tools for photo retouching and is great for just about anyone who wants to whip out a quick illustration from a digital photo. Essentially, Photoshop is the industry standard and the most popular of its kind. It is available in two versions: the regular Photoshop and Adobe Photoshop Elements, a more stripped-down version that's available free on the web. **Sketching and Pre-Creation** When you open Photoshop, it's best to open an image you've already got ready and open. When you import an image from a digital camera, the Camera RAW (CR2) file format is used and it's best to open a RAW file in Photoshop so you can load the data into the program. You can do this by opening Photoshop and choosing Image ► Open. In the Open dialog box, choose RAW or Camera RAW format. Otherwise, if you plan to make a lot of edits to the image before you export it, it's a good idea to simply place the image on the canvas and make the necessary adjustments. But if you want to work on the image to create what will be a one-of-a-kind photo, then use the Layer Panel, which is at the bottom of the main screen. If you're familiar with GIMP, the free graphics software, the process is similar: Open an image on the canvas and open the Layer Panel. **Editing** The basic editing tools are on the top bar, including the Swatch Panel (by default it's associated with the CMYK color model), palettes, layers, Layers Panel, and rulers. If you select a tool from the top bar, a little pop-up menu appears to allow you to select a color model in which to work, as well as a foreground and background color. Below that pop-up menu, a bar appears that allows you to select the tool. You can choose a brush, pen tool, eraser, gradient, an object selection tool, a shape tool, or a text tool.

Ottawa Mayor Jim Watson is being sued for defamation by a Toronto immigration lawyer, alleging the mayor lied about a case he was attempting to bring to the Supreme Court of Canada. "He's a liar, he's a bully and he's wrong," said David Eisler of Toronto who filed the \$13 million lawsuit in Ottawa on Monday. "If he would have disclosed that he had been to my law office and my services were not needed, we would have dealt with it properly, but he made a public statement which is absolutely false." The lawsuit names both the federal and provincial governments and also names the Ontario Bar Association, the National Alliance of Canadian Immigration Lawyers, the group that represents Eisler, a Canadian citizenship officer and his colleague. The lawsuit comes just a week after Eisler called for an investigation by police, based on his belief that he was targeted in an attempt to stop his legal work. Watson denied the accusation, saying he had simply contacted him as a human rights activist to ask if he was acting for an individual in a refugee case. Watson says he called Eisler at his law office and was willing to come in person to explain, and asked if he could look at his cellphone records. "I was going to make sure that this person wasn't attempting to, through my law firm, through my work with the National Alliance and my organization, to take advantage of his case and to get him out of Canada and to the United States," said Watson. "This is going to go through every day, every day" Eisler said the suit was filed in the civil courts on the advice of a Toronto law firm, who he said told him they didn't want to deal with the lawsuit and the Mayor's Office of the City of Ottawa. He said he was surprised by the lawsuit which he said would have a chilling effect on public figures who may want to speak out in the public interest. "It's my opinion that this administration ... encourages misleading comments and misrepresentations," said Eisler. "This is going to go through every day, every day. It's going to set a precedent. No one's ever going to know what the tolerance of public figures are." Watson has told CBC News the lawsuit is a "prank," which he said he was going to dismiss. "It's obviously a very serious attempt to make a political point
